Re: ~~1034501-St. Clair County, St. Louis/SCA Milan~~

Dear Mr. Toler:

The Illinois Environmental Protection Agency, Division of Land Pollution Control recommends that your Region nominate the SCA-Milan landfill located near East St. Louis, Illinois for a Hazardous Waste Field Study. The site is located approximately at the northeast corner of the intersection of I-55 and Route 203 in St. Clair County. The site has accepted waste considered "hazardous" by RCRA, several of which have been identified both by chemical/physical characteristics and volume disposed. The Agency has studied the site using both site supplied boring logs and information gathered by the Agency's drill rig and field investigations.

For more information about the site's history or any other site specific information please contact Mr. Ken Mensing, Manager of our Collinsville field office at (618) 345-4606.

Sincerely,

Robert G. Kuykendall, Manager
Division of Land Pollution Control
